SKILLS

Javascript – Native JS & ESNext. React & JS frameworks, Typescript, and NextJS. Single page applications. Some Postgres, Prisma, GraphQL, and Angular. 10 years JS experience.

WordPress – Custom WordPress theme & plugin development for enterprise clients. Custom Gutenberg blocks, headless WP, REST API, and theme.json. 15 years PHP experience.

Stylesheets – Lean, performant, and organized CSS. Styled components and design systems. PostCSS & SCSS, Webpack & Stylelint config.

Markup – Semantic, WCAG accessible HTML. Template components in JSX, PHP, or Liquid.

Tech Lead – Functional requirements & estimates, software architecture, code review & deployments. Leading engineering teams. Tooling & utilities.

Design – User experience feedback, feasibility reviews. Implementing Figma, InVision mock-ups. Icon & Logo Design. Skilled with Adobe Illustrator, Photoshop and InDesign.

ABOUT

I'm a Brooklyn-based web developer with 11 years experience working remotely for WordPress VIP partner agencies. Computer programming has always fascinated me. I'm still impressed with code, and how it's able to turn ideas into software that people can use. I'm currently working as a freelance web developer, and ready to join a new remote team as a senior front-end developer.

EXPERIENCE

10up, Inc.
Senior Front-End Engineer, Feb 2019 - Nov 2023

I led project teams at a fully-distributed WordPress VIP parter agency, creating distinctive and fully customized user experiences for the web.

Developed enterprise-scale websites & applications with WordPress plugins & themes, React, Headless WP, TypeScript, NextJS, and Gutenberg. Delivered projects for GE, Hilton, CA.gov, T-Mobile, and more.

As a Project Tech Lead, I coordinated with clients and engineers to manage functional requirements, meet deadlines, and contribute to internal project tooling.

Alley Interactive
UX Developer, Dec 2014 - Jun 2018

Collaborated with a remote scrum/agile team to build, maintain, and optimize some of the busiest sites at a top WordPress VIP partner agency.

As a project tech lead, I worked with ES6, PostCSS & SCSS, Webpack, React, Angular, in-browser prototyping, build configs, and styleguide generators.

Oomph, Inc.
Front-End Developer, Jul 2012 - Feb 2014

Worked with project teams for clients at a WordPress VIP partner agency. Tasks involved custom theme & plugin development for WordPress and Drupal.

eMagine Communications
Website Maintenance, Mar 2010 - Mar 2012

Managed the maintenance desk, and handled client requests. Fixed bugs, added new features, and redesigned themes. WordPress, Joomla, and .NET

EDUCATION

Rhode Island College
Graphic Communications, Jan 2008 – Jan 2010

Pursued a BA in Graphic Communications.
